Job experience

- Part-Time Front-End Developer (10/2023 : Present) - Lytic

- Freelance Projects:

You can see clients rating from here : <https://mostaql.com/u/Abdallamy/reviews>

1- Property Management System:

One of the most important project I work on as freelancer [link](#)

Features: A comprehensive system for managing properties, units, renters, owners, rent agreements, and payments. Features include:

- **Property Management:** Handle properties, units, and renters.
- **Payment Tracking:** Manage payments for rent, maintenance, and insurance, with follow-up and reporting capabilities.
- **Maintenance & Invoices:** Track maintenance tasks and generate invoices and reports.

2- EMSAT Staff Management System

A system designed for managing staff for the EMSAT exam conducted by the Emirates Ministry [Link](#)

Features include:

- **Admin Page:** Configure duties, add centers, manage shift records, and exam types.

- **Attendance Management:** Track and approve staff attendance, including profile management and signature uploads.
- **Financial Review:** Access financial records and attendance data.

Projects

Portfolio

My portfolio website contains the latest projects that I made

E-Commerce-apps:

1-E-trade:

React.js – React redux – React router – React Query – Tailwind CSS – SCSS – MUI

Features:

- Login authentication and user accounts: Developed login system and user account management system using firebase, and used it to authenticate users before granting them access to protected routes, and allowing users to create and manage their own accounts, including adding products to their cart and wish list, , viewing their order history.
- Filter products based on criteria like price, and category, enabling users to quickly find and sort items of interest, search for a product, resulting in a 40% reduction in search time and improved overall user satisfaction.
- Ability for users to change the number of products per page
- Checkout form validation
- Created custom pagination & implemented single page product functionality.
- Developed an admin dashboard that allows administrators to manage the product catalog, add and remove products, and modify subcategories.

Admin Email: admin@etrade.com

Admin Password: Admin123456789
